OBJECTIVE

To make a difference in engineering, utilities, and facilities management through a more challenging position.

QUALIFICATIONS

Over 29 years experience in U.S. Air Force, state and local government public works and utility operations and maintenance. Experience includes project management, work force supervision and staff development, planning, design, budget development and execution, construction management and quality assurance. Extensive experience delivering projects on time within budget.

EMPLOYMENT

2007-Present Utilities Director, Marion County, FL

Leads a department of 106 people providing daily utility operations, regulatory compliance and capital projects serving 27,000 water and 18,000 wastewater customers. Oversees an operating budget of \$23 million including rate analyses and financial planning. Provides leadership for staff training, safety, professional development and managing priorities. Responsible for budget preparation, customer service, engineering, project management, and utility operations/maintenance functions. Manages a \$100 million, 5-year capital improvement program including water and wastewater plant capacity projects, reclaimed water and improved R&R on system components. Responsible for policy formulation, public meetings and media relations concerning utility issues.

- ? Justified rate structure and revenue sufficiency needs to secure a rate increase for improved water conservation while salvaging the financial stability of the utility.
- ? Secured SRF funding for a regional force main and two advanced wastewater treatment plant upgrades.
- ? Revamped O&M program to add maintenance programs and improving customer service.
- ? Initiated a master plan to identify future capital requirements in coordination with development.

2000-2007 Public Utilities Director, City of Clearwater, FL

Led a 175-person utility department responsible for three advanced wastewater treatment plant, a reverse osmosis water treatment plant, a reclaimed water system, a 580-mile water distribution system (33,000 taps) and a 400-mile wastewater collection system. Developed strategies, goals and plans to meet regulatory requirements, infrastructure improvements and workforce development. Managed a \$52 million annual operating budget and a \$180 million, 6-year capital improvement program.

- ? Built, staffed and operates an \$8-million, 3 mgd reverse osmosis water treatment plant on time within budget.
- ? Featured on EPA's Website for setting a national example (one of only 15 communities) on wastewater collection system maintenance, operations and management.
- ? Justified approval of two multi-year annual rate increases to support infrastructure improvements. Consistently under ran budgets.
- ? Implemented asset management.
- ? Negotiated Consent Order agreements with FDEP over wastewater treatment plant compliance then brought plants into compliance.

1999-2000 Water Superintendent, City of Clearwater, FL

Led a 54-person water division responsible for reclaimed water system, 580-mile water distribution system and water production. Managed a \$17 million operating budget. Responsible for construction project development.

? Justified need for and initiated planning on a 3-mgd reverse osmosis water treatment plant.

1996-1999 Public Works Director, City of Treasure Island, FL

Led a 45-person department responsible for fleet maintenance, grounds, buildings and coastal structures, storm water management, wastewater collection and engineering support. Managed a \$5.1 million annual budget.

? Negotiated five year, \$430,000 contract for recycling services averting a 35% increase in fees.

? Managed a \$1.3 million bridge repair contract to \$95,000 under budget on schedule.

? Justified and obtained a \$100,000 Florida Recreation Development Grant as well as grant funding for the recycling program.

? Initiated a safety program that reduced insurance payments by 43% saving \$62,000 annually.

1994-1995 Planning Engineer, West Coast Regional Water Supply Authority, Clearwater, FL

Program manager for \$300 million master water plan providing 85-mgd in new water supplies to over 2 million people in three Florida counties. Responsible for integrating project plans, funding, schedules and public involvement working in concert with five utilities.

? Developed and implemented plan securing consultants, negotiating costs and schedules, for a \$7.5 million, multi project plan for preliminary design and permitting.

? Formulated scope and direction of a regional well rehydration program.

1994-1995 Corporate Property Manager, Sports and Recreation, Inc., Tampa, FL

Responsible for developing facility programs and accepting construction for a national, 80-store retail chain. Established facility standards, negotiated contracts and evaluated cost/benefit of maintenance options. Managed a \$1.2 million capital budget.

? Saved over \$54,000 annually negotiating maintenance contracts for HVAC, lighting and fire alarm systems.

? Initiated design review process improving delivery of new stores incorporating previous lessons learned.

1992-1994 Commander, 39th Civil Engineering Squadron, Turkey

Responsible for public works and disaster planning operations for a base with over 300 buildings, a 10,000 foot runway, a water and wastewater system, roads, signs and related infrastructure. Responsible for a 640-person, \$22 million base maintenance contract providing all infrastructure maintenance including solid waste operations. Responsible for support to five remote sites in Turkey. Managed \$6.5 million operating and \$5 million annual capital project budgets.

? Solved water contamination problem by coordinating maintenance improvements with construction of a new \$1.2 million water treatment plant.

? Revitalized environmental compliance program by increasing staff and improving base maintenance contract standards.

? Formulated long-range facility modernization efforts using owner assessments to secure five fold increase in funding.

1990-1992 USAF Construction Program Manager, Andrews AFB, Maryland

Managed a \$571 million military construction program (MILCON) and \$15 million design fund accounts supporting the USAF's research, development and testing programs. Project manager over 16 MILCON projects at three locations. Coordinated funding efforts and resolved project management issues with the US Army Corps of Engineers.

? Implemented fast track \$45 million effort to relocate a test wing from Ohio to California.

? Developed strategy to deliver a \$4 million corrosion control facility within budget using

prefabricated components.

1984-1990 Director, USAF Project Support Office, Washington DC and Texas
Managed USAF construction support for Department of State facilities worldwide. Conducted site surveys, determined material support requirements, checked adequacy of designs, determined material needs and manpower requirements and shipped materials to construction sites worldwide. Coordinated with multiple agencies to secure project approvals and work schedules. Supervised 104 people.

? Determined portion of the plan to rehab the US Embassy in Moscow after the new building was compromised.

? Obtained specialized training for USAF construction crews and integrated that training into work schedules.

1979-1984 Civil Engineering Officer, Brooks AFB, Texas and Crete, Greece
Responsible for public works facility planning and project cost development. Projects included road, storm water, wastewater collection, water system, new building construction and renovations. Prepared project costs, initial layouts and economic evaluation of alternatives. Supervised 9 people.

? Tripled project funding eliminating the backlog of maintenance and repair projects by justifying additional engineering staff.
